### DETAILED ACTION

1. Claims 1-20 are pending in this application.

### *Election/Restrictions*

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7 (in part), 9-12 (in part) and 14-20 (in part), drawn to compounds where D together with R<sup>6</sup> to R<sup>9</sup> = benzoxazine.

Group II, claim(s) 1-7 (in part), 8, 9-12 (in part), 13 and 14-20 (in part), drawn to compounds where D together with R<sup>6</sup> to R<sup>9</sup> = quinoline.

Group III, claim(s) 1-7 (in part), 9-12 (in part) and 14-20 (in part), drawn to compounds where D together with R<sup>6</sup> to R<sup>9</sup> = indole.

Group IV, claim(s) 1-6 (in part), 9-11 (in part) and 14-20 (in part), drawn to compounds where D together with R<sup>6</sup> to R<sup>9</sup> = other heterocyclic ring.

Group V, claim(s) 1-5 (in part), 9-10 (in part) and 14-20 (in part), drawn to D together with R<sup>6</sup> to R<sup>9</sup> = non-heterocyclic ring.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is a benzoxazine ring and is different from the special technical

feature Of Groups II-V. The special technical feature of Group II is a quinoline ring and is different from the special technical feature of Groups I and III-V. The special technical feature of Group III is an indole ring and is different from the special technical feature of Groups I-II and IV-V. The special technical feature of Group IV is other heterocyclic rings e.g. benzothiazole, benzothiazne, pyrimidine, quinoxaline, etc. and is different from the special technical feature of Groups I-III and V. The special technical feature of Group V is non-heterocyclic ring e.g. cyclohexyl ring and is different from the special technical feature of Groups I-IV.

If Group IV or V is elected, applicants required to elect a single disclosed species.

A telephone call was made to Mr. Mark Boland on April 15, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
